True Cash Discount Pricing Program

Combine cash discounting with dual pricing at the POS.

THE POWER OF CHOICE

With the growing demand for cash discounts and dual pricing, True Cash Discount by Dejavoo gives merchants the best of both worlds. By selecting cash, debit or credit, your customers will receive a discount for cash or debit, and the list price or credit cards.

Contact us today to learn more.
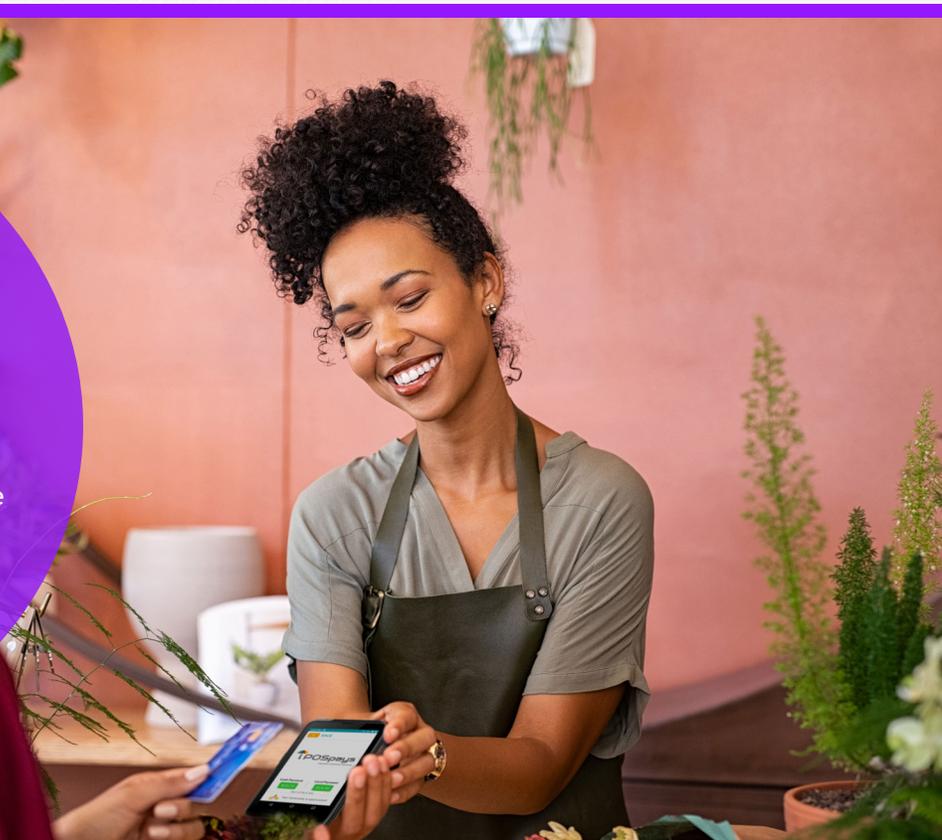

Accurate, pre-tax calculations

Merchants can offer an accurate discount to cash and debit paying customers by adding a preset discount to an itemized price list. Customers can view their pricing options and choose to pay with cash, credit or debit cards.

Treat Debit as Cash

The "debit as cash" option allows merchants to treat debit cards like cash. This feature can increase sales, retain your merchants, and beat the competition.

Seamless and Intuitive

With TCD, the list price is converted into a dual or multi-pricing display to show customers their final payment options. TCD reports and receipts do not show any fees, only saved or unrealized discounts.

No Fees or Extra Charges

The TCD user interface, software application, reports and receipts do not create the impression that customers are paying extra to use credit or debit cards but instead rewards customers with discounts when they pay with cash.

Have questions or need help?

A dedicated team member will be with you every step of the way.
