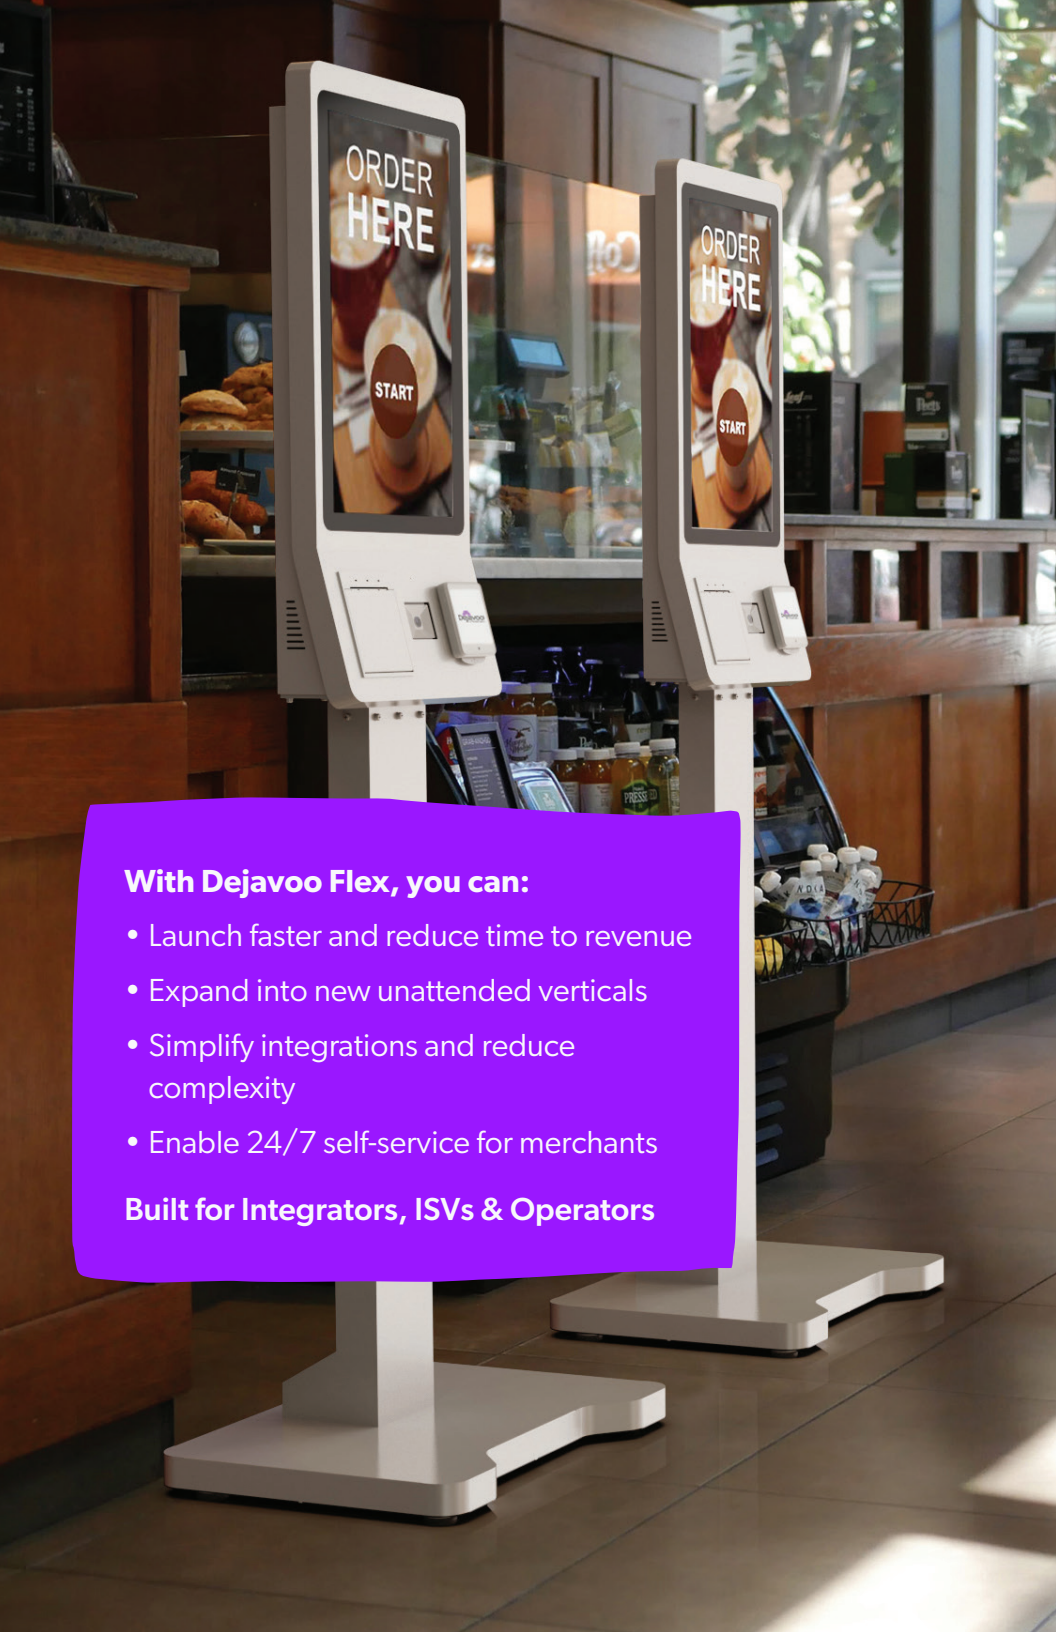
From kiosks to vending to EV charging – Dejavoo Flex powers it all.

Dejavoo Flex: The Complete Unattended Platform for ISOs, ISVs & Operators

Build it your way. Launch faster.
Scale without limits.

Dejavoo®
an IPOS systems company



With Dejavoo Flex, you can:

- Launch faster and reduce time to revenue
- Expand into new unattended verticals
- Simplify integrations and reduce complexity
- Enable 24/7 self-service for merchants

Built for Integrators, ISVs & Operators

A Complete Unattended Platform for **ISOs**

Expand Your Offering

- Choose your **processing partners** (TSYS, Fiserv, Elavon)
- Separate **technology from processing**
- Add unattended solutions without complexity
- Support flexible **payout configurations**

Drive New Revenue

Unlock new unattended verticals:

- Offer flexible **merchant solutions**
- Adapt to different operator needs
- Scale without platform limitations

Built for Flexibility

- No processor lock-in
- Works across multiple environments
- Simplified deployment model
- Future-ready platform

One Platform. More Opportunity.

Grow your portfolio with **flexible infrastructure**:

- Support operators with **modern unattended solutions**

A Complete Unattended Platform for **ISVs**

Build Without Constraints

- Decouple **software from processing**
- Integrate without a heavy API lift
- Support multiple processors (TSYS, Fiserv, Elavon)
- Adapt to different deployment models

Simplify Integrations

- Works with existing **VMS platforms**
- Enable server-side commands
- Reduce custom development effort
- Faster time to market

Designed to Scale

- Flexible architecture
- Supports multiple use cases
- Easy to expand across operators
- Future-proof your platform

Build Once. Deploy Anywhere.

- Flexible foundation for unattended innovation
- Scale across partners, processors, and markets

A Complete Unattended Platform for **Operators**

Take Control of Your Operations

- Use your preferred **VMS provider**
- Flexible **payout timing** (next day / weekly)
- Remote machine control (vend, credit, pricing)
- Manage transactions with **Void + Refund**

Reduce Dependency

- Control **terminal settings (TMS)** directly
- No need for provider-side changes
- Faster response to cancellations
- Lower unnecessary processing costs

Operate More Efficiently

- Simplified day-to-day management
- Works with existing infrastructure
- No complex integrations required
- Built for small–mid operators

More Control. More Flexibility.

- Run your business your way
- Flexible tools designed for real operators
